

SUMMARY CARDS FOR L1495 CATALOGUE PAPER

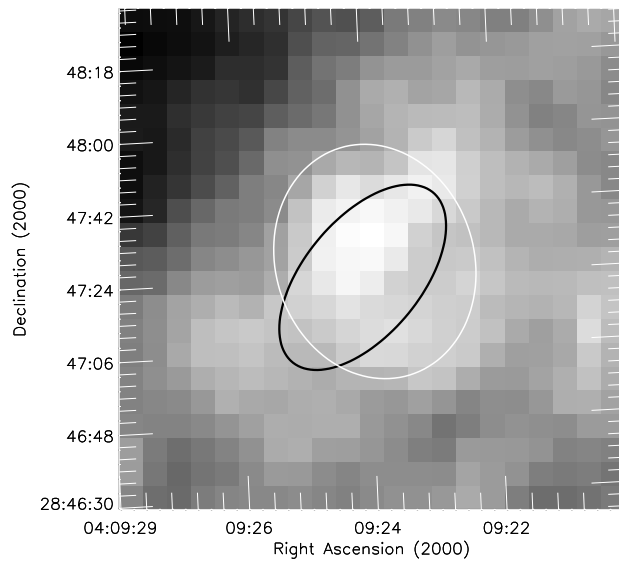

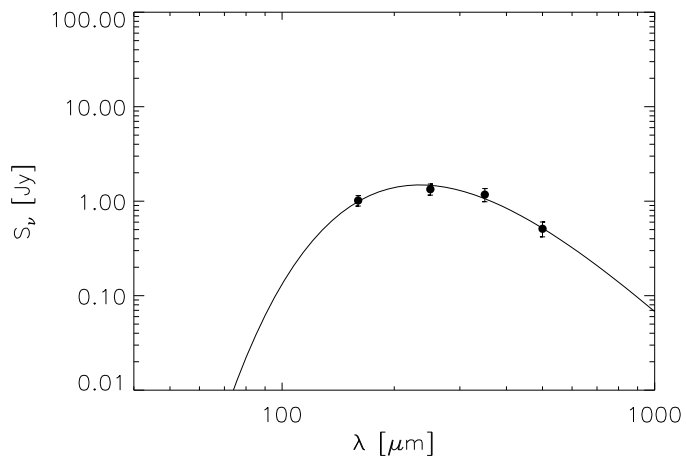

Each summary card begins with the source number and name, where the latter is derived from J2000 sexagesimal coordinates. Cards are in order of increasing right ascension and have a 1:1 correspondence with the entries in the catalogue and the table of derived parameters (Tables B1 and B2 of the paper, respectively).

Other information consists of:

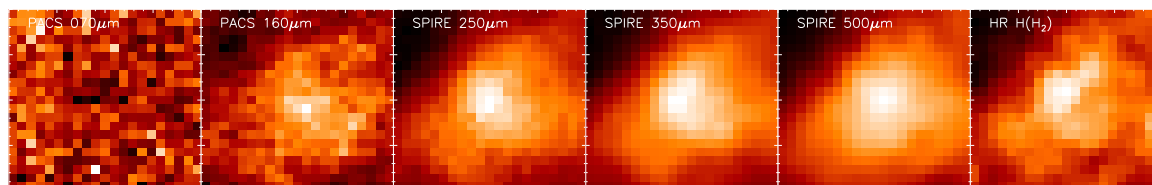

1. Cutout image of column density ($2' \times 2'$, at $18.2''$ resolution) with superposed source ellipses:
 - Black = *getsources* extraction, 50% elliptical contour.
 - White = CSAR extraction, 50% elliptical contour.
2. Spectral energy distribution.
3. Cutout images ($2' \times 2'$) of the source at the five observational wavelengths, plus a column density image at $18.2''$ resolution.
