Motivations

Physical mechanisms,
nature of shocks:

- parametric molecular

Jimenez-Serra et al. 2008

- molecular

Neufeld & Kaufman 1996

Flower & Pineau des Forêts 2015

- radiative precursor

Hollenbach & McKee 1989

- irradiated

(=FUV-illuminated)

Lesaffre et al. 2013,

Melnick & Kaufman 2015

Motivations

Physical mechanisms,
nature of shocks

Astrochemistry:

- SiO

Caselli et al. 1997,
Schilke et al. 1997,
Gusdorf et al. 2008a,b, 2011,
Guillet et al. 2009,
Jimenez-Serra et al. 2009,
Nguyen Luong et al. 2011,
Anderl et al. 2013,
Leurini et al. 2014,...

- H₂O/OH/OI

WISH/WADI *Herschel* KP,
Recent SOFIA works

- ionized species

Podio et al. 2014 & ref. therein

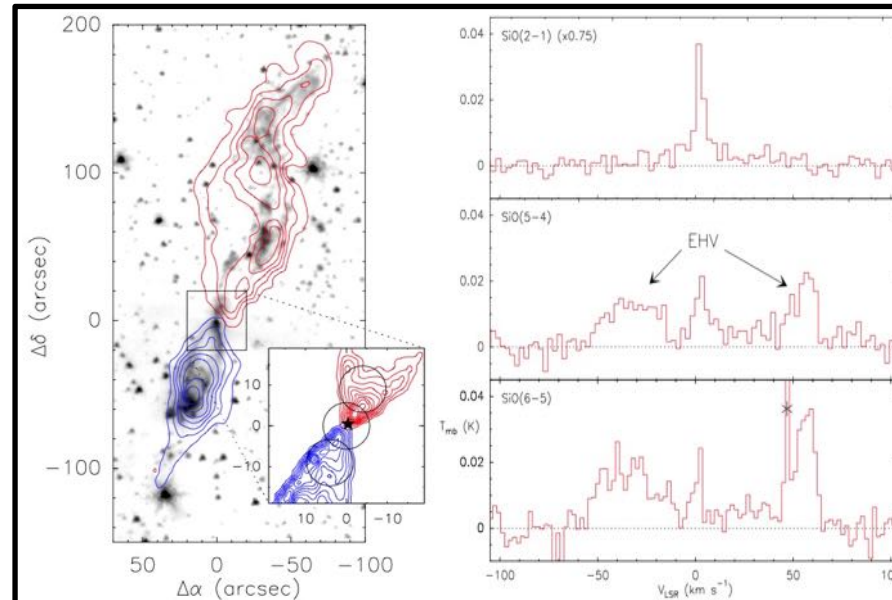

- COMs

Codella et al. 2015 & ref. therein

Also see L. Podio's talk

Leurini et al. 2015
G5.89-0.39

Tafalla et al. 2015
L1157

Motivations

Physical mechanisms,
nature of shocks

Astrochemistry

Energetic impacts and
contribution to energetic
balance of galaxies:

- Galactic studies

Cabrit & Berthout 1990,

Bontemps et al. 1996,

Beuther et al. 2002,

Zhang et al. 2005,

Lopez-Sepulcre et al. 2009,

Visser et al. 2014 & ref. therein

- extragalactic studies

Hailey-Dunsheath et al. 2012,

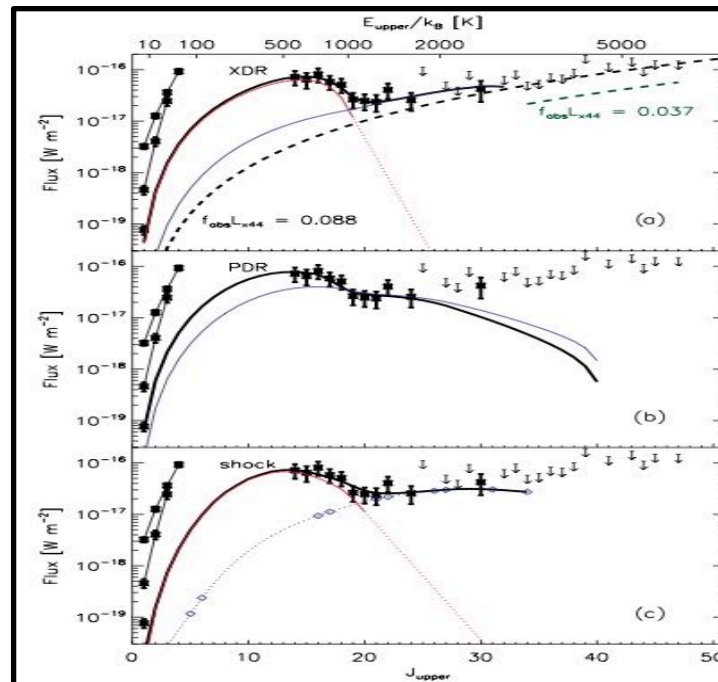

Meijerink et al. 2013,

Kamenetzky et al. 2014

& ref. therein

Kamenetzky et al. 2014
CO ladders

Hailey-Dunsheath et al. 2012
CO ladders in NGC1068

Motivations

Physical mechanisms,
nature of shocks

Astrochemistry

Energetic impacts and
contribution to energetic
balance of galaxies

Star formation scenarios
through the mass-ladder:

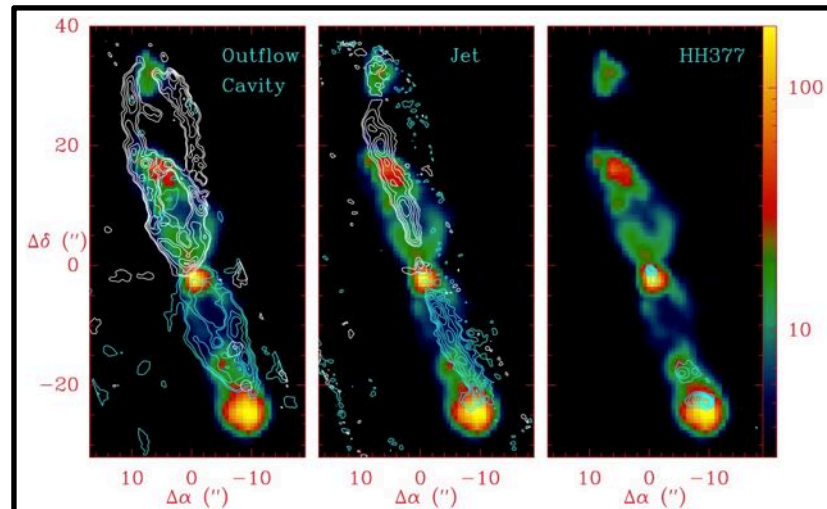

- inducing
low-mass to high-mass

Codella et al. 2012,
CALYPSO program,

Lefloch et al 2015,
Hunter et al. 2008

- induced

Xu et al. 2011

Lefloch et al. 2015
CO in Cep E

Xu et al. 2011
SF induced by SNR
shock in IC443 ?

Motivations

Physical mechanisms,
nature of shocks

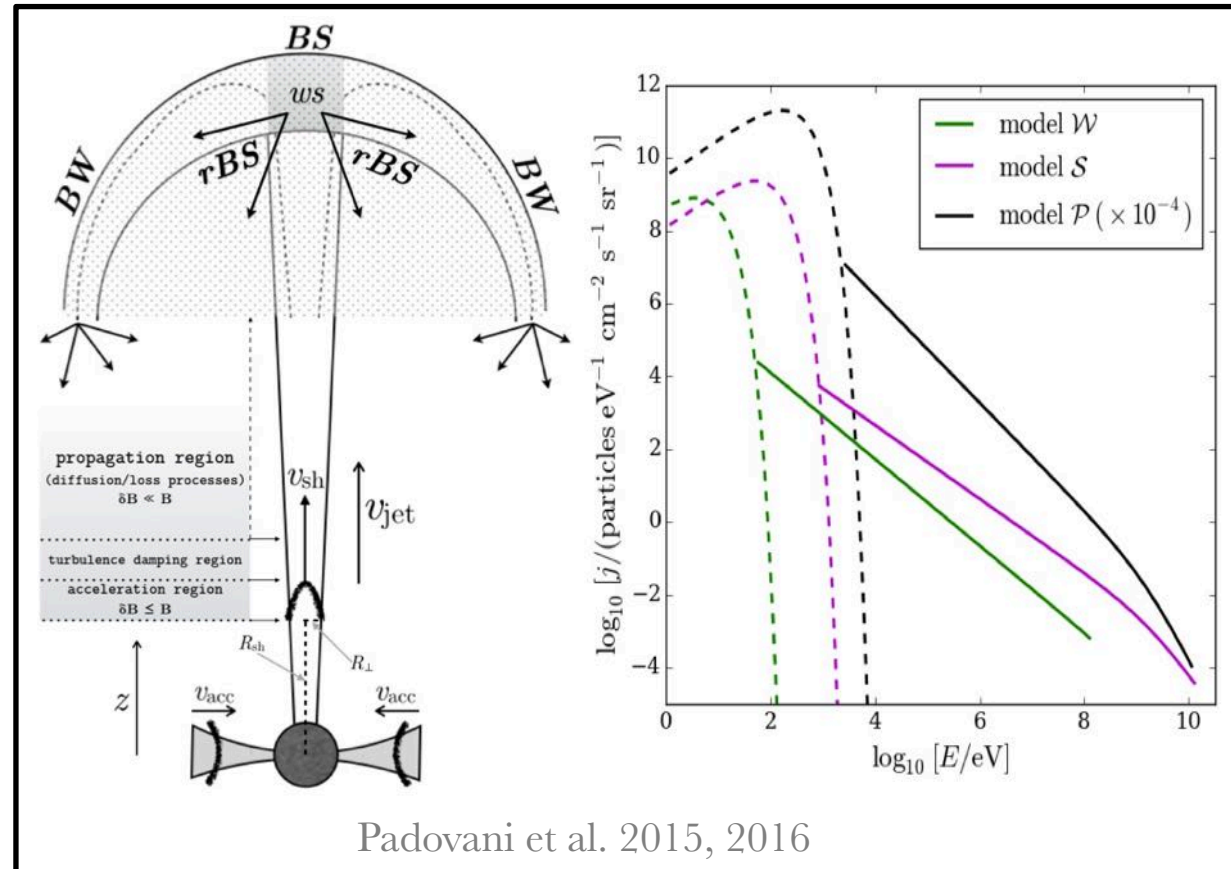

Astrochemistry

Energetic impacts and
contribution to energetic
balance of galaxies

Star formation scenarios
through the mass-ladder
(induced or inducing shocks)

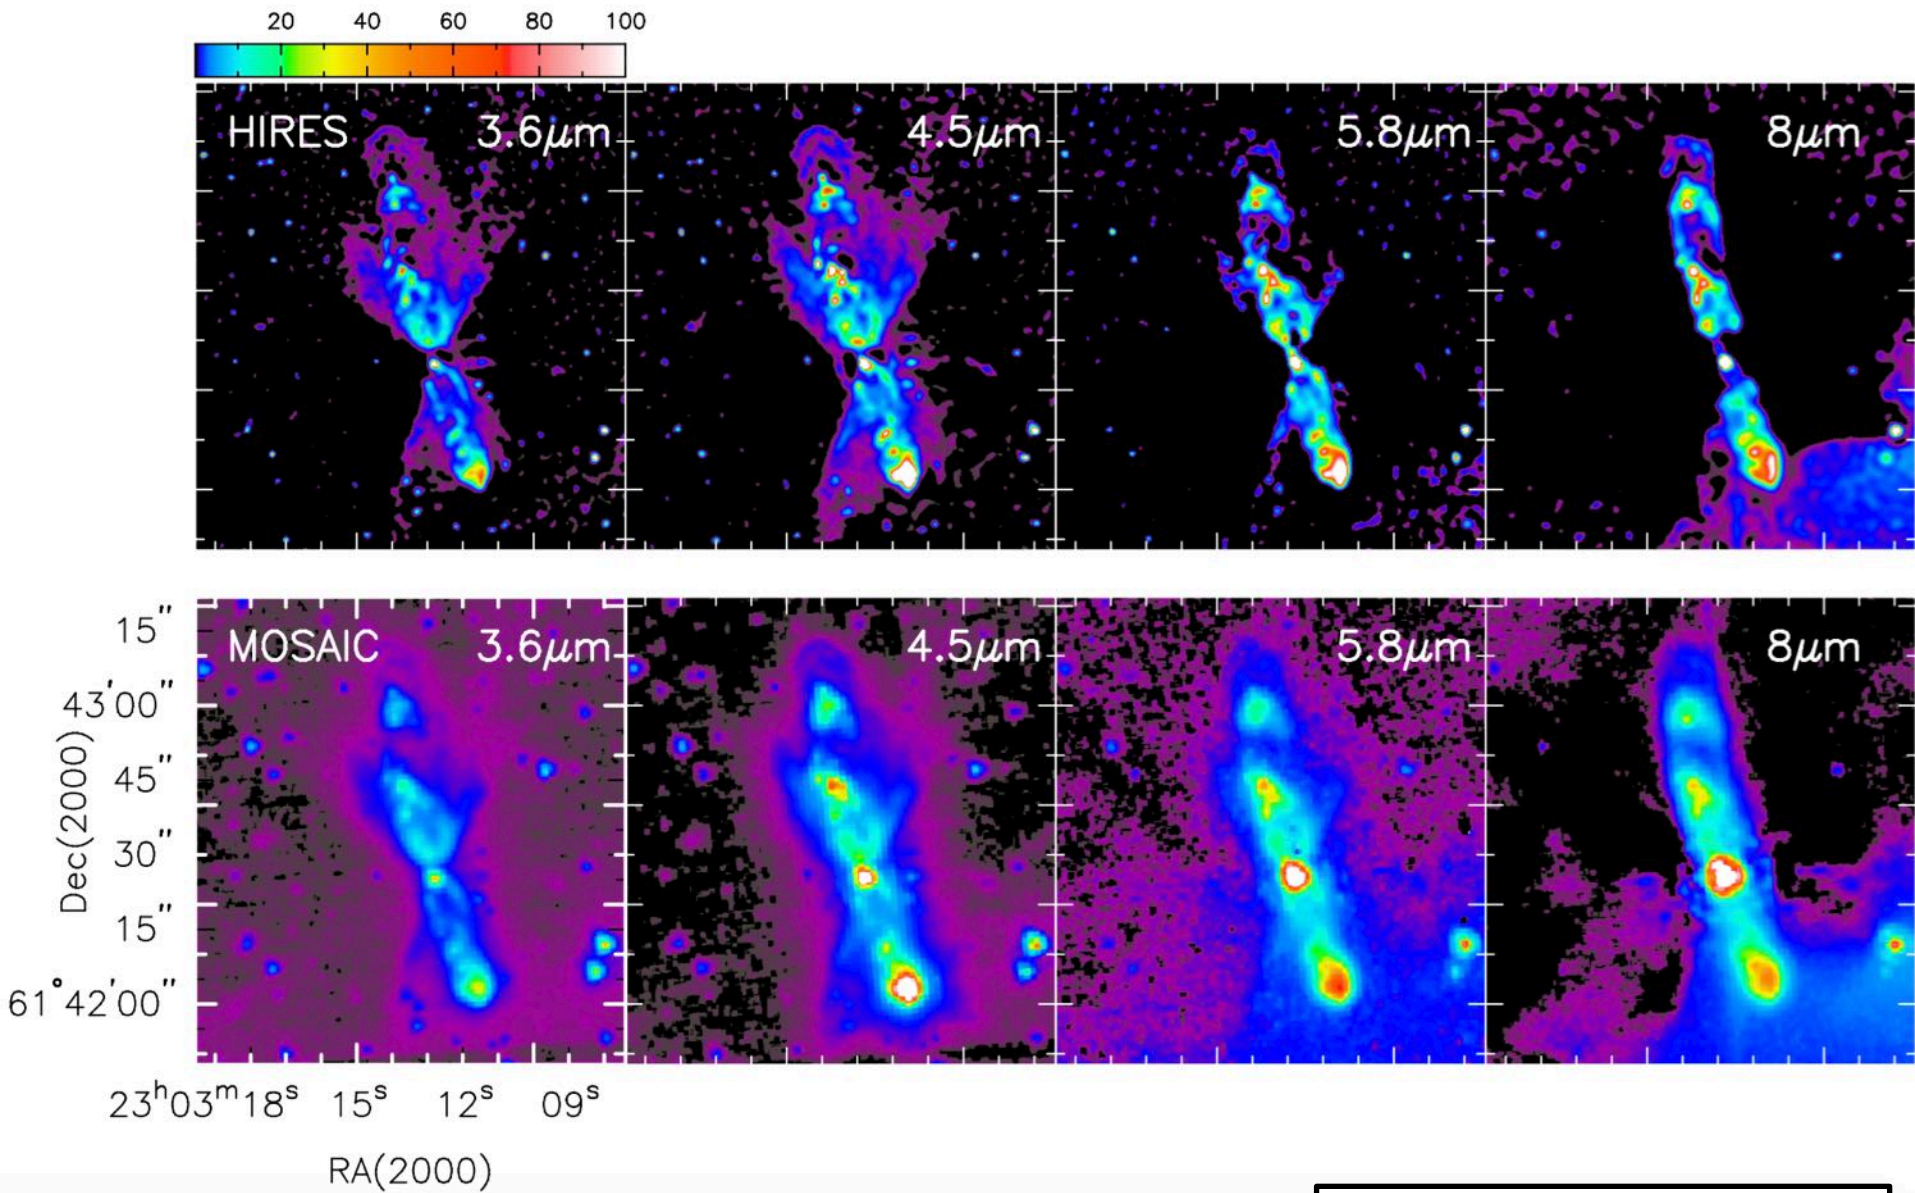

CR-related questions:
acceleration, composition,
propagation:

Araudo et al. 2007,

...and CO (2-1)

Previous studies of Cep E

Cep E in H₂ 1-0 S(1) at 2.12 μm ...

...and CO (4-3)

Previous studies of Cep E

- Numerous NIR, MIR and sub-mm observations (ISO, *Spitzer*, IRAM-30m): Eislöffel et al. 1996, Noriega-Crespo et al. 1998, 2014, Moro-Martín et al. 2001, Smith et al. 2003, Lefloch et al. 2011, ...

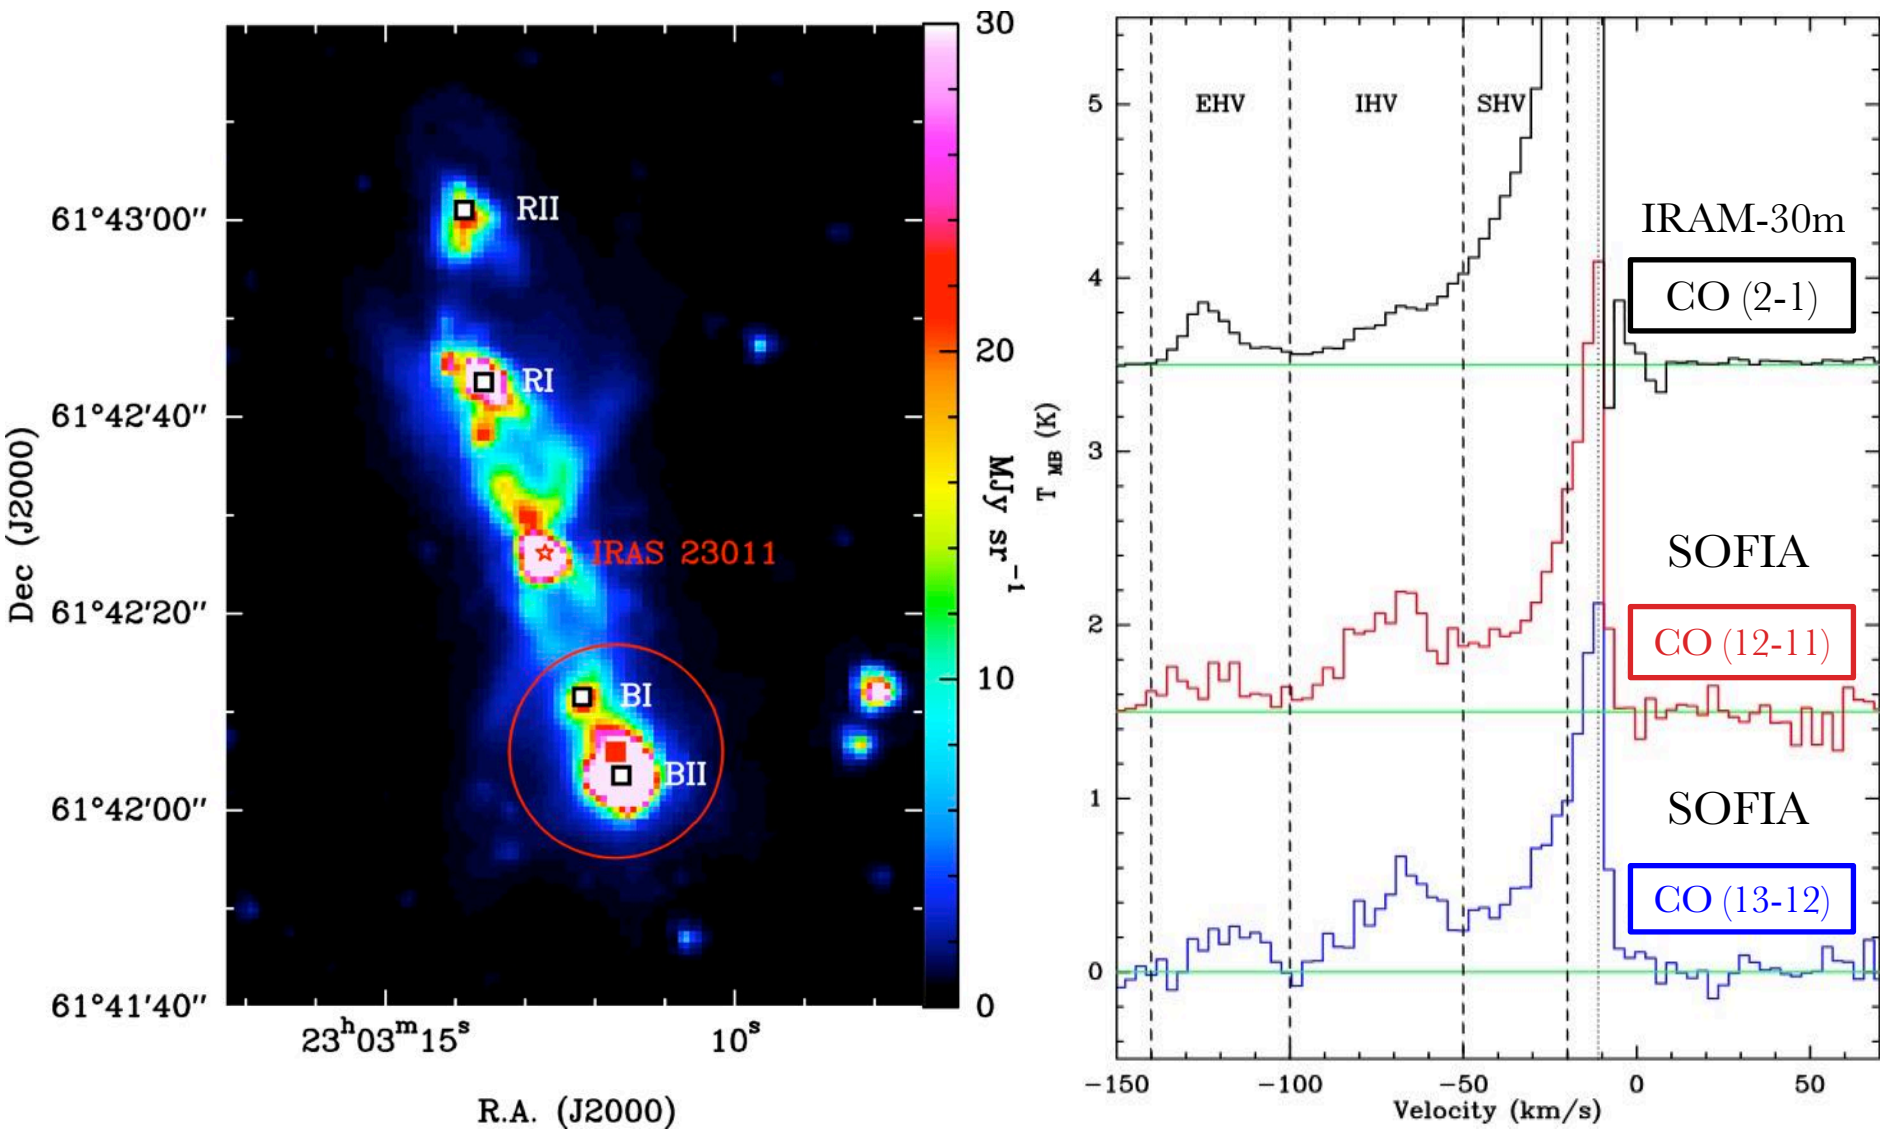

The SOFIA/GREAT observations: CO

The Cep E outflow at 4.5 μm by *Spitzer*/IRAC

Gomez-Ruiz et al. 2012

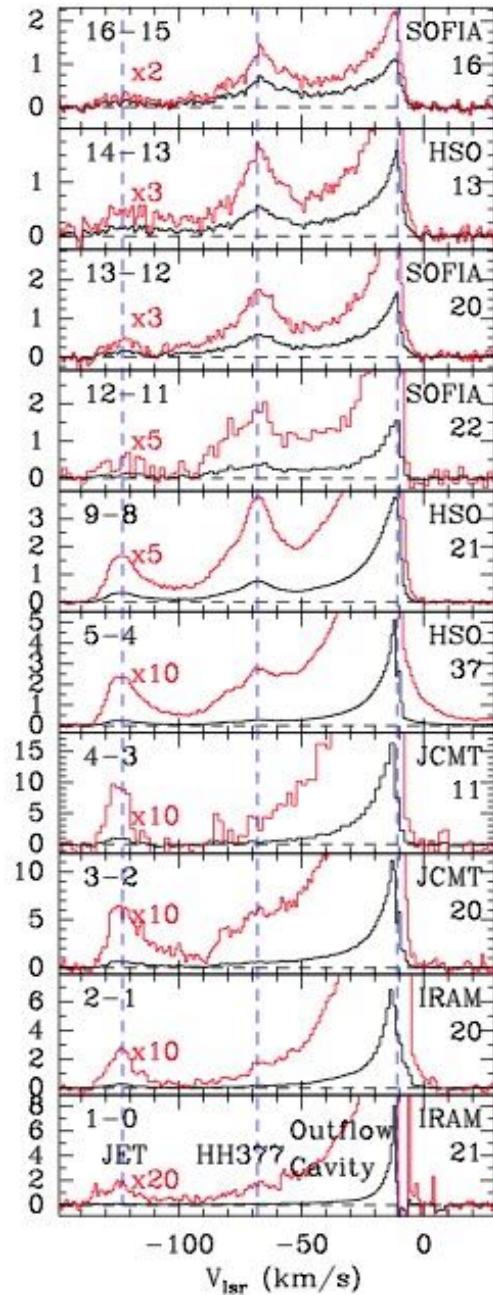

The Cep E outflow at $4.5 \mu\text{m}$ by *Spitzer*/IRAC

Gomez-Ruiz et al. 2012

The SOFIA/GREAT observations: CO

CO spectra: IRAM-30m, JCMT, *Herschel*, SOFIA
 Also: ^{13}CO (2-1) by IRAM-30m and ^{13}CO (5-4) by *Herschel*

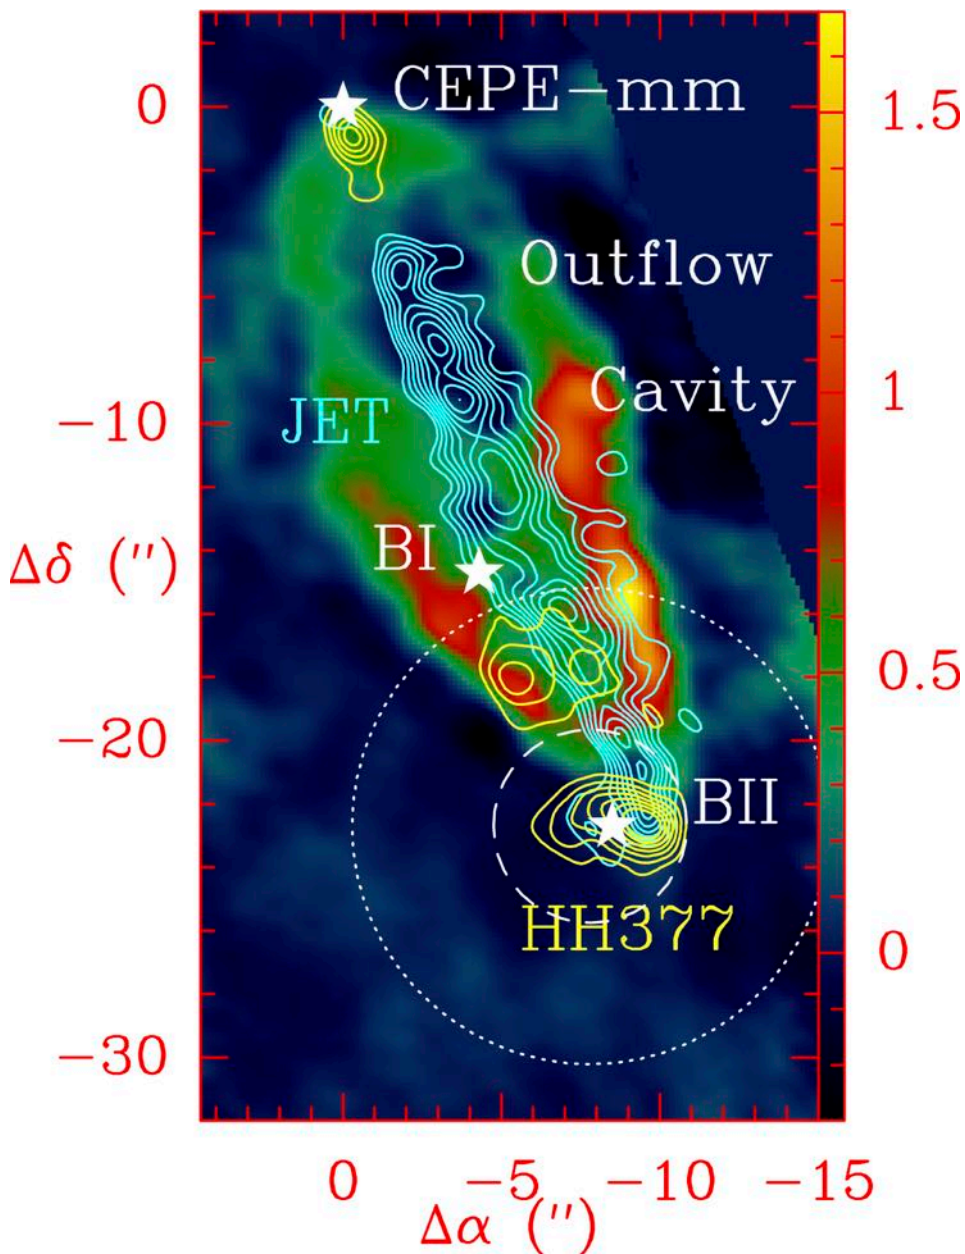

CO spectra: IRAM-30m, JCMT, *Herschel*, SOFIA
 Also: ^{13}CO (2-1) by IRAM-30m and ^{13}CO (5-4) by *Herschel*

The Cep E outflow in CO (2-1) by the PdBI, Lefloch et al. 2015

- Jet, cavity, HH 377: CO

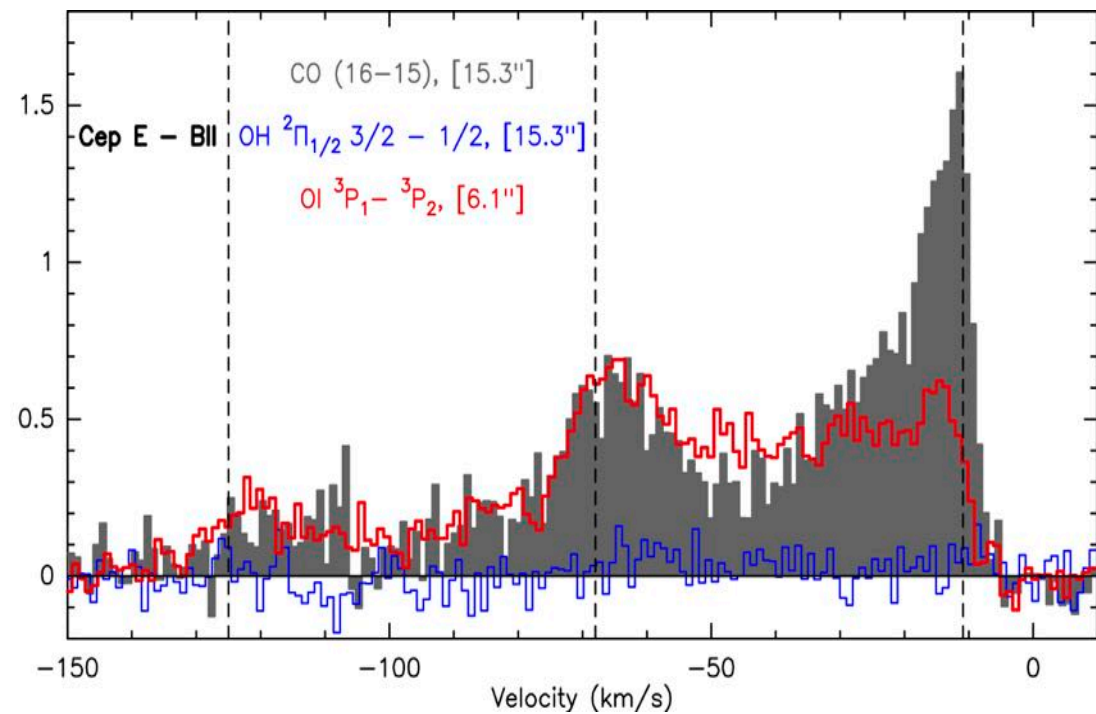

LVG analysis \Rightarrow (N , T_{kin}) estimates

- Southern lobe:

- jet mass: $0.02 M_{\odot}$, $1.7 M_{\odot}\text{km/s}$
- outflow cavity mass: $0.32 M_{\odot}$, $2.8 M_{\odot}\text{km/s}$

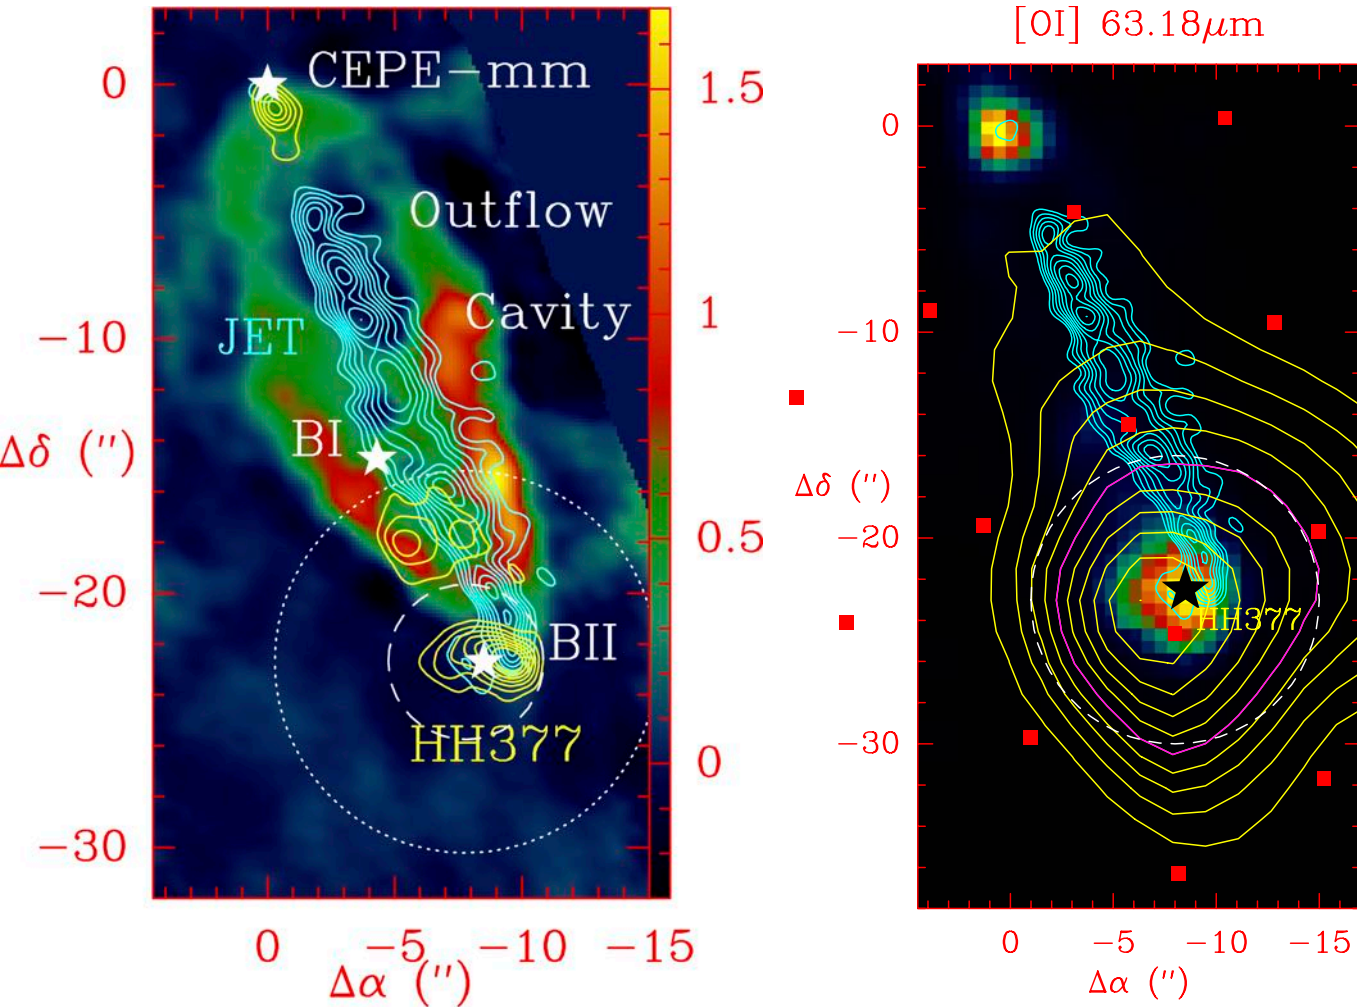

\Rightarrow molecular jet driven bowshock

The SOFIA/GREAT observations: [OI]

Gusdorf et al., 2017

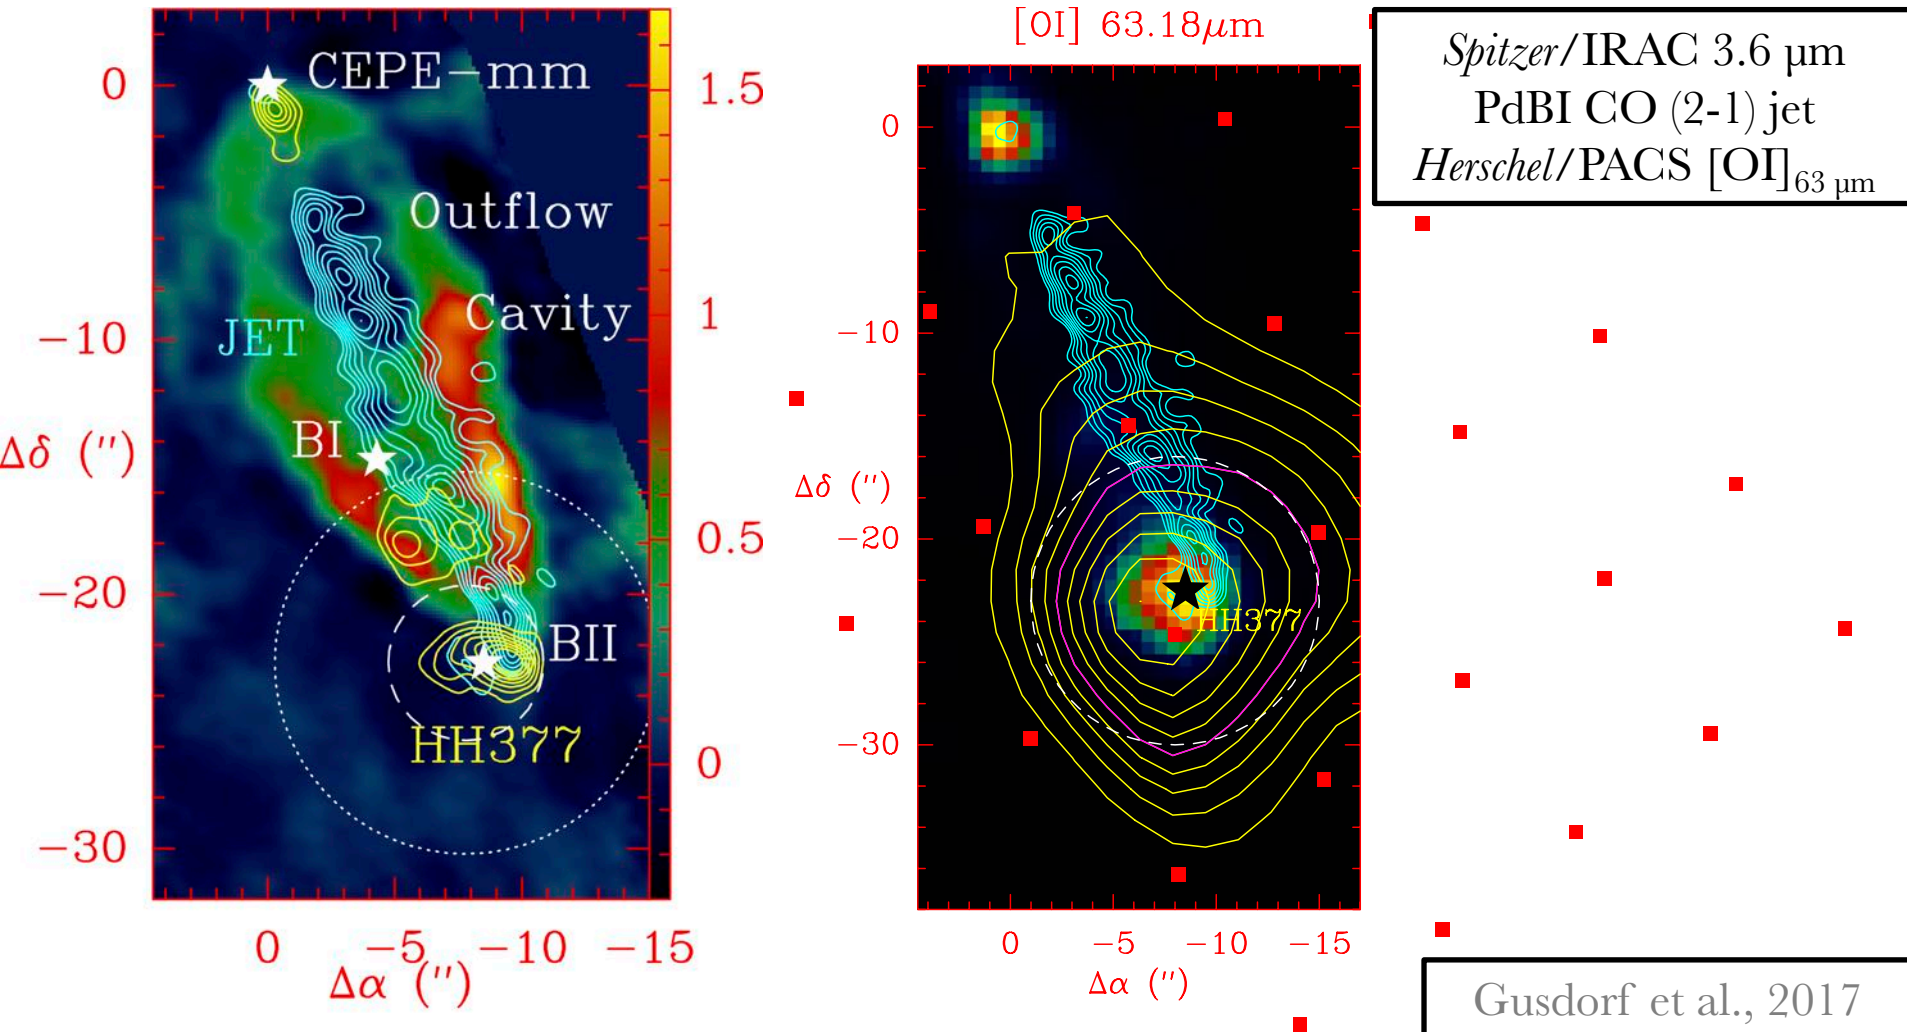

The SOFIA/GREAT observations: [OI]

Spitzer/IRAC 3.6 μm
PdBI CO (2-1) jet
Herschel/PACS [OI]₆₃ μm

Gusdorf et al., 2017

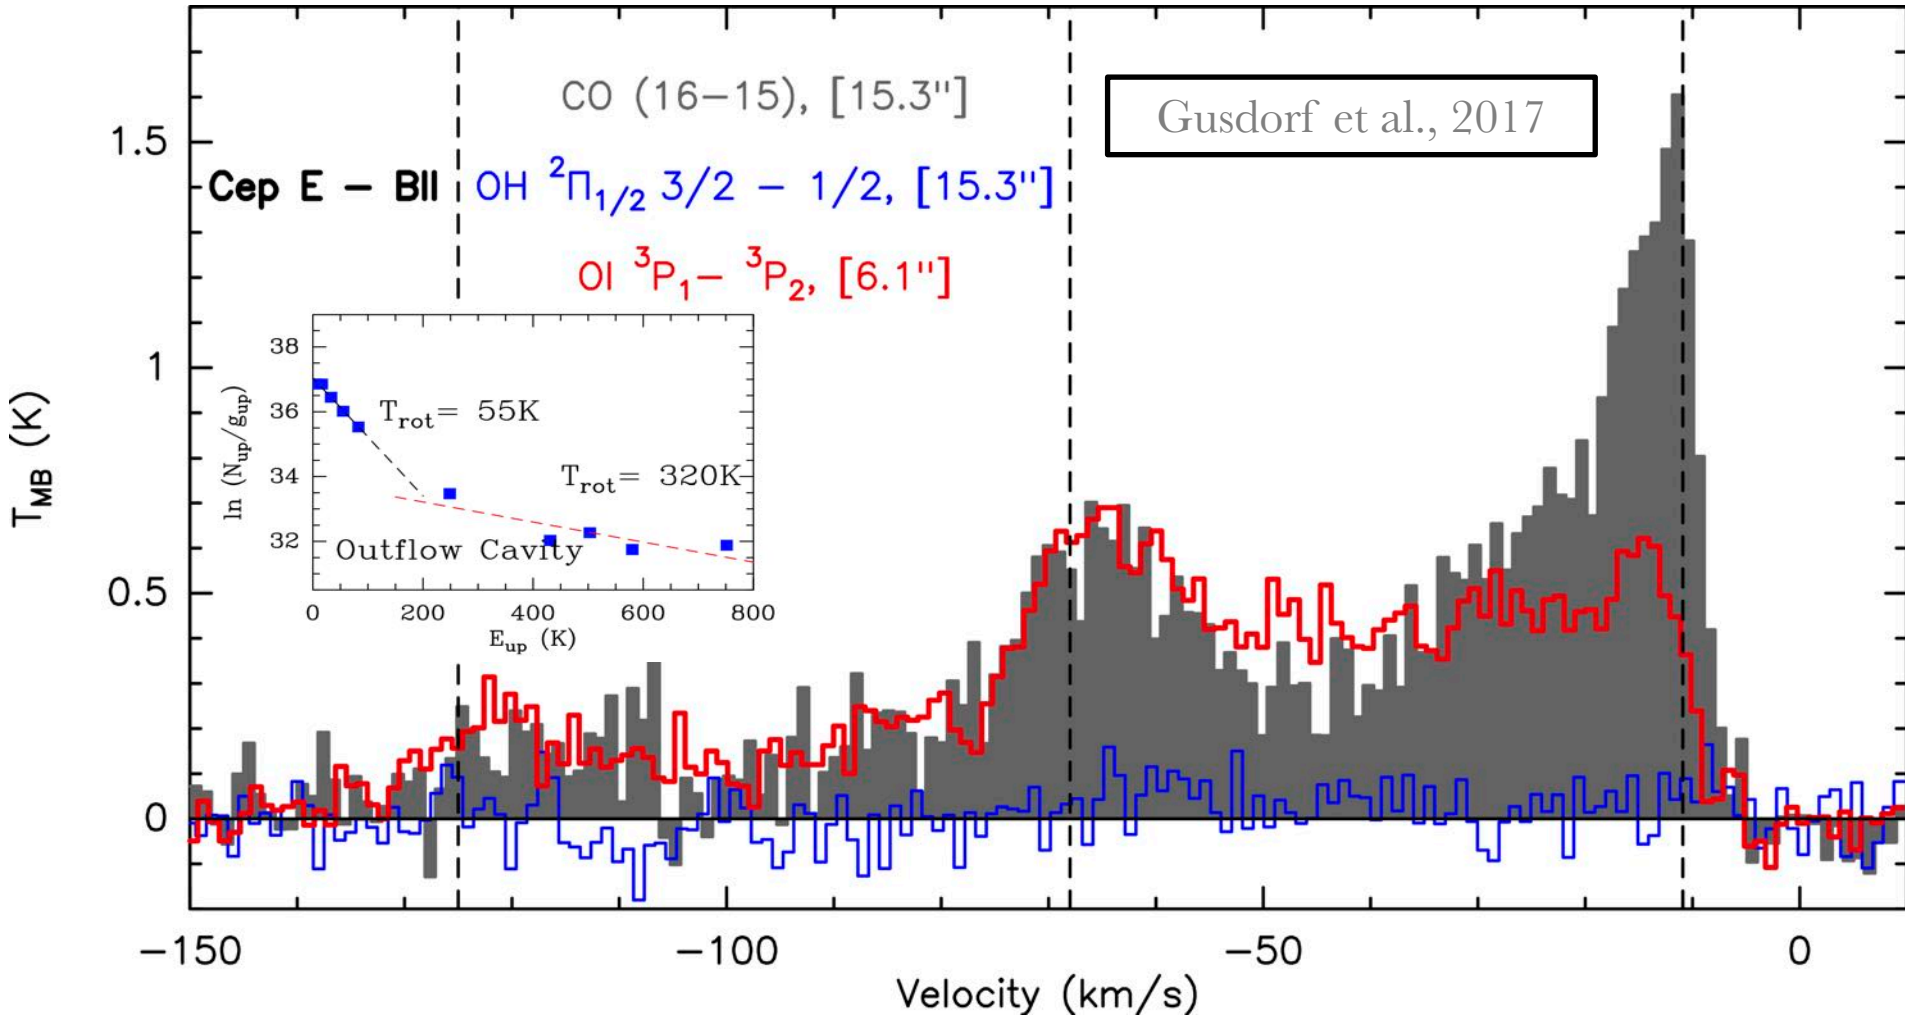

The SOFIA/GREAT observations: [OI]

Component	Jet	Bow-shock	Outflow cavity
Filling factor OI $^3\text{P}_1 \rightarrow ^3\text{P}_2$	0.25 ± 0.05	0.55 ± 0.15	<1
Filling factor CO (16–15)	0.09	0.06	0.15
